In the Beginning The Gospel of the Brothers Barnabas The Thing Happens Tragedy of an Elderly Gentleman A collection of primary sources on anarchism. The author of several dozen seminal treatises on Mormon doctrine, Orson Pratt (1811-81) produced a library of spirited and thoughtful expositions and defenses of the LDS church that charted the course for all subsequent church theologians. Born in Henderson, New York, Pratt was a contemporary of Joseph Smith, who, like his successor Brigham Young, often depended on Pratt's rhetorical skills and scientific eclecticism in presenting the Mormon message to the outside world. Since Pratt was a member of the leading Quorum of Twelve Apostles, many of his works were published in pamphlet form for proselytizing purposes. His rudimentary mathematical talents were also relied on to help navigate the first party of pioneers to the Great Salt Lake Valley. He was the first Mormon to enter the valley—three days before Young. A stubborn and fiercely independent intellectual, Pratt also clashed with Smith over polygamy and with Young over the nature of God and the origin of the soul. Their arguments eventually led Young in 1875 to demote him within the quorum, reducing his chances of succeeding to the church presidency. Pratt suffered from diabetes, and his final years were plagued by illness. He died in Utah at the age of seventy. Nevertheless, his influence has continued. Pratt was the first to write and publish an account of Smith's famous "first vision," and he authored one of the earliest confessions of Mormon doctrine, which Smith later used in composing his own "Articles of Faith." Pratt edited the Latter-day Saints' Millennial Star, The New York Messenger, The Seer, and The Prophetic Almanac, the latter consisting of astrological observations, folk wisdom, theological essays, and one of the first LDS statements that humans could become gods. Pratt's most controversial speculation was
that atoms, then thought to be indestructible and indivisible, were intelligent, self-conscious, sentient, self-propelled particles which bonded together to form colonies in the shape of plants, minerals, animals, humans, and gods, and which were tutored over time in the “great school of the universe.” His writing was thus a unique blend of biblical and pseudo-scientific philosophy. Twentieth-century reprints of his works have tended to overlook his more controversial ideas and emphasized the less radical ones. In the present compilation, care has been taken to remain faithful to the originals, leaving nothing out. Through the use of critical thinking questions and data-based exercises, Evan Berman and Xiaohu Wang’s Exercising Essential Statistics helps students apply the techniques described in Essential Statistics for Public Managers and Policy Analysts, Fourth Edition. This accompanying workbook gives students the opportunity to practice these techniques through hands-on, carefully crafted exercises. Various examples are provided from human resource management, organizational behavior, budgeting, and public policy to illustrate how public administrators interact with and analyze data. The workbook's CD includes seven data sets that cover a range of measures and applications (available in SPSS, SAS, SYSTAT, Stata, and Excel). 

A profoundly inspiring yet practical guide to well-being from one of modern Judaism's most beloved sages. As a congregational rabbi for half a century and the bestselling author of When Bad Things Happen to Good People and twelve other books on faith, ethics, and how to translate the timeless wisdom of religious thought into dealing with everyday challenges, Harold Kushner knows a thing or two about living a good life. In this compassionate new work, Kushner distills nine essential lessons from the sum of his teaching, study and
experience, offering a lifetime's worth of spiritual food for thought, pragmatic advice, inspiration for better living, and strength for trying times. With vital, original insights into everything from belief ("there is no commandment in Judaism to believe in God"), to conscience (the Garden of Eden story as you've never heard it), to mercy ("forgiveness is a favor you do yourself, not a favor to the person who offended you"), grounded in Kushner's brilliant readings of Scripture, history and popular culture, Nine Essential Things I've Learned About Life is a capstone addition to Kushner's oeuvre"--One of the greatest spiritual teachers of the twentieth century addresses the conflicts that arise between people with opposing views and the dangers of losing your individual identity in your desire to belong to a group with shared values. In Belief, Doubt, and Fanaticism: Is It Essential to Have Something to Believe In?, Osho brings his unique and often surprising perspective to the religious, political, social and economic forces that drive people into opposing camps, fanatical groups, and belief systems that depend on seeing every “other” as the “enemy.” As always, the focus is first and foremost on the individual psyche and consciousness, to identify the root causes and hidden demons of our human need to belong and have something to “believe in.” Osho challenges readers to examine and break free of the conditioned belief systems and prejudices that limit their capacity to enjoy life in all its richness. He has been described by the Sunday Times of London as one of the “1000 Makers of the 20th Century” and by Sunday Mid-Day (India) as one of the ten people—along with Gandhi, Nehru, and Buddha—who have changed the destiny of India. Since his death in 1990, the influence of his teachings continues to expand, reaching seekers of all ages in virtually every country of the world. On the vedantic philosophy of Śaṅkaracarya. This
collection of speeches explains the principal elements of Islam—belief in the existence and Unity of God, in resurrection and the Day of Judgment, in the Divine Scriptures, as well as other familiar themes of Islamic discourse. Don't Believe the Chatter provides strategies to defeat your burden of discouragement. Find freedom through knowing the truth!
living, this book provides practical applications and personal strategies along with concepts grounded in scientific research to achieve a balance between science and the real world. Topics backed by research - including a chapter devoted to violence - provide students with an overview of today's health issues. When we're going through challenging times, we tend to think we're alone. In the middle of the bad times, it's difficult to see how life could ever be even just okay again, never-mind good. The purpose of this book is to provide encouragement and inspiration for those who are going through challenges from which they can currently see no relief. Reading stories of ordinary people overcoming extraordinary challenges using a technique you can use to achieve the same results is one of the most empowering gifts you can give to yourself. "It's 2 a.m. I am in Hawaii. And I'm dying. The pain comes in my body and the voice in my mind confirms it. This is real. Cancer is real. As I look down the barrel of my own emotional gun, my mind flashes back to conversations with another practitioner when I recall saying to her of her Fibromyalgia recovery account - "It's alright for you - You've got a story! I don't have one! " Well, be careful what you ask for - because you just might get it. I'll rephrase that. Be careful what you ask for -you will definitely get it. I definitely had a story now. The question was would I live to tell it?"

Foreword by Robert G. Smith (Founder of FasterEFT)

A hugely engaging collection of pieces by Karel Capek, one of the great European writers of the last century. Why Do You Not Believe?, is one devotional about faith and salvation in Christ. Written by Andrew Murray, one of the most important preachers of all time. The book features a daily devotional message of meditation based on the Bible. There are 31 messages that will bless your life and awaken the faith in his heart. Playful and provocative, irreverent and inspiring, Capek is perhaps the best-loved Czech writer of all time. Novelist and playwright, famed for inventing the word 'robot' in his play RUR, Capek was a vital part of the burgeoning artistic scene of Czechoslovakia of the 1920s and 30s. But
it is in his journalism - his brief, sparky and delightful columns - that Capek can be found at his most succinct, direct and appealing. This selection of Capek's writing, translated into English for the first time, contains his essential ideas. The pieces are animated by his passion for the ordinary and the everyday - from laundry to toothache, from cats to cleaning windows - his love of language, his lyrical observations of the world and above all his humanism, his belief in people. His letters to his wife Olga, also published here, are extraordinarily moving and beautifully distinct from his other writings. Uplifting, enjoyable and endlessly wise, Believe in People is a collection to treasure.(1E 1991) Discusses communication/social organization/space/ environmental control/biological variations/time/etc.

What are the essentials that people must believe in to be a Christian? The author answers that question with eight essential beliefs in part 1. Part 2 adds eight more believes that are almost essential. The third part of the book lists eight essential practices of Christians.
