Subject
The delivery and availability of information resources is a vital concern to professionals across multiple fields. This is particularly vital to data intensive professions, where easy accessibility to high-quality information is a crucial component of their research. Library and Information Services for Bioinformatics Education and Research is an authoritative reference source for the latest scholarly material on the role of libraries for the effective delivery of information resources to optimize the study of biological data. Highlighting innovative perspectives across a range of topics, such as user assessment, collection development, and information accessibility, this publication is ideally designed for professionals, managers, computer scientists, graduate students, and practitioners actively involved in the field of bioinformatics.

Provides information on ways to implement the Library 2.0 service model to reach new library users and facilitate more user-driven services and technology.

This book explores the links between militancy and migration, two movements that transformed the socio-political landscape of late 20th-century Punjab. Re-analysing existing writings and drawing on fieldwork and local history archives, it presents a different framework to analyse the politics and social history of Punjab.

The International Encyclopedia of Information and Library Science was published to widespread acclaim in 1996, and has become the major reference work in the field. This eagerly awaited new edition has been fully revised and updated to take full account of the many and radical changes which have taken place since the Encyclopedia was originally conceived. With nearly 600 entries, written by a global team of over 150 contributors, the subject matter ranges from mobile library services provided by camel and donkey transport to search engines, portals and the World Wide Web. The new edition retains the successful structure of the first with an alphabetical organization providing the basic framework of a coherent collection of connected entries. Conceptual entries explore and explicate all the major issues, theories and activities in information and library science, such as the economics of information and information management. A wholly new entry on information systems, and enhanced entries on the information professions and the information society, are key features of this new edition. Topical entries deal with more specific subjects, such as collections management and information services for ethnic minorities. New or completely revised entries include a group of entries on information law, and a collection of entries on the Internet and the World Wide Web.

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

This book explores the structural features of Indian society, such as caste, tribe, sect, rural-urban relations, Sanskritization and untouchability. Based on a wealth of field research as well as archival material, the book interrogates the prevailing thinking in Indian sociology on these structures; Studies Indian society from contemporary as well as historical perspectives; Analyses caste divisions vis-a-vis caste hierarchy. Critically examines the public policies regarding caste-less society, reservations for Backward Classes, and the caste census. This second edition, with four new chapters, will be a key text for students and scholars of sociology, social anthropology, political science, modern history, development studies, and South Asian studies.

Do systems have souls? This book, based on a popular elective at IIM Ahmedabad, looks for answers in the hard-trade-offs inherent in the design of operating systems and business models. It encourages business leaders to ask two different sets of existential questions: Does the organization that I am managing have a soul, and if so, what are the strategic choices that enable its synthesis (external orientation)? And, do I have a soul, and if so, who am I (internal orientation)? In the process, it uncovers a beauty inherent in patterns of strategic choices that enables an organizational soul to emerge, and an appreciation of the diversity of such souls.

The emerging generation of research and academic library users expect the delivery of user-centered information services. ‘Apomediation’ refers to the supporting role librarians can give users by stepping in when users need help. Library 3.0 explores the ongoing debates on the “point of oh” phenomenon and its impact on service delivery in libraries. This title analyses Library 3.0 and its potential in creating intelligent libraries capable of meeting contemporary needs, and the growing role of librarians as apomediators. Library 3.0 is divided into four chapters. The first chapter introduces and places the topic in context. The
The Whole Library Handbook, now in its fifth edition, is an encyclopedia filled with facts, tips, lists, and resources essential for library professionals and information workers of all kinds, all carefully handpicked to reflect the most informative, practical, up-to-date, and entertaining examples of library literature. Organized in easy-to-find categories, this unique compendium covers all areas of librarianship from academic libraries to teen services, from cataloging to copyright, and from gaming to social media. Selections include Facts and figures on library workers Bookmobile guidelines 100 great libraries of the world Job search and recruitment techniques, and advice on how to deal with tough economic times Tips on writing articles and book reviews Fun with cataloging rules Famous librarians' favorite books Covering a huge spectrum of librariana, this one-of-a-kind volume is both educational and entertaining.

Sivasankari (born October 14, 1942) is a renowned Tamil writer and activist. She has carved a niche for herself in the Tamil literary world during the last four decades with her works that reflect an awareness on social issues, a special sensitivity to social problems, and a commitment to set people thinking. She has many novels, novellas, short stories, travelogues, articles and biographies to her credit. Her works have been translated into several Indian languages, English, Japanese and Ukrainian. Eight of her novels have been made into films, having directed by renowned directors like K. Balachander, SP Muthuraman and Mahendran. Her novel 'Katti' on girl child labour, filmed by the director Janaki Viswanathan, won the President's Award. Sivasankari's novels have also been made as teleserials, and have won the national as well as regional 'Best Mega Serial' awards. As a multi-faceted personality, she has won many prestigious awards including Kasturi Srinivasan Award, Raja Sir Annamalai Chettiyar Award, Bharatiya Bhusha Parishad Award, 'Woman of the year 1999-2000' by the International Women's Association, and so on. 'Knit India Through Literature' is her mega-project involving intense sourcing, research and translations of literature from 18 Indian languages, with a mission to introduce Indians to other Indians through culture and literature.

Twelve Years a Slave (1853) is a memoir and slave narrative by Solomon Northup, as told to and edited by David Wilson. Northup, a black man who was born free in New York, details his kidnapping in Washington, D.C. and subsequent sale into slavery. After having been kept in bondage for 12 years in Louisiana by various masters, Northup was able to write to friends and family in New York, who were in turn able to secure his release. Northup's account provides extensive details on the slave markets in Washington, D.C. and subsequent sale into slavery. This book offers a contemporary approach to the study of religion in modern South Asia. It explores the development of religious ideas and practices in the region, giving students a clear and critical understanding of social, political and historical context. Part One takes a fresh look at some familiar themes in the study of religion, such as deity, authoritative texts, myth, worship, teacher traditions and caste, and helps students understand diverse ways of approaching these themes. Part Two focuses on some of the key ways in which Buddhism, Hinduism, Islam and Sikhism in South Asia have been shaped in the modern period. Overall the book considers the impact of gender, politics, and the way religion itself is variously understood. The chapters contain a compelling range of primary source materials and a series of geographical and historical 'snapshots' to orientate readers to South Asia. Valuable features for students include images, task boxes, discussion points, suggestions for further reading, a timeline and glossary of
The book is a timely contribution in the context of the sustainable development goals pursued globally and the need for India to re-examine its infant and child mortality reduction policy. The book builds the argument with a strong theoretical framework and political philosophy such as John Rawls’ " and " and Amartya Sen’s " metric. In addition, this book uses multidisciplinary approach to tackle the issue of demographic and social problems such as high infant mortality persistent over a long period of time. Although the book’s focus is on India as a case study, the arguments and policy implications can be replicated in any other context or scenario with high infant and child mortality rates.

This book presents the latest findings on network theory and agent-based modeling of economic and financial phenomena. In this context, the economy is depicted as a complex system consisting of heterogeneous agents that interact through evolving networks; the aggregate behavior of the economy arises out of billions of small-scale interactions that take place via countless economic agents. The book focuses on analytical modeling, and on the econometric and statistical analysis of the properties emerging from microscopic interactions. In particular, it highlights the latest empirical and theoretical advances, helping readers understand economic and financial networks, as well as new work on modeling behavior using rich, agent-based frameworks. Innovatively, the book combines observational and theoretical insights in the form of networks and agent-based models, both of which have proved to be extremely valuable in understanding non-linear and evolving complex systems. Given its scope, the book will capture the interest of graduate students and researchers from various disciplines (e.g. economics, computer science, physics, and applied mathematics) whose work involves the domain of complexity theory.

Focusing on the twin issues of identity and development that are often signifiers of the unravelling politics in the federal polity, the book make a concerted attempt to look at (and beyond) the states by exploring the specificities of the regions within these states. It does so through a comparative study from the vantage point of democratic politics as it unfolds in recent India. Emphasising that regions within the states are not merely politico-administrative instituted constructs but are also imagined or constituted, among others, in historical, geographic, economic, sociological or cultural terms, it argues that any meaningful comparative study of the regions would naturally straddle the disciplinary boundaries of social sciences. The book attempts to go beyond the states and look at the regions within them as a distinctive analytical category for an in-depth study of the democratic politics of identity and development unfolding at the state level.

6 SUCCESS SECRETS Second Edition includes Dhoni’s Secret to Facing Setbacks National Bestseller Over 70,000 Copies Sold Do you tend to buckle under pressure? Do you find yourself losing your cool in stressful situations? Do you find yourself unlucky in spite of working hard? Think and Win like Dhoni is not just a usual book about cricket, but a book that will help you to beat the odds. Get ahead of your competitors using tips and tricks from former Indian captain Mahendra Singh Dhoni’s life, shared by the man himself! Everyone says MS Dhoni is lucky. But have you ever wondered why he is so lucky? How does he manage to cash in on opportunities? How does he remain calm in the face of immense pressure? What is his secret to facing setbacks? What makes him a great leader and a youth icon? Discover the mind power of the boy who travelled the road to exclusivity, from being a regular Ranchi lad to a world-famous cricketer. Learn how to build confidence, dismiss fear, and perform top-class so that you enjoy immense success in work and life. SFURTI SAHARE is a bestselling author and an international motivational speaker. She has shared the stage with top celebrities in India, and her posts and blogs enjoy a large and loyal fan base on LinkedIn and Instagram. She regularly conducts workshops in various parts of India on Being World-Class in Your Profession.

This textbook differs from others in the field in that it has been prepared very much with students and their needs in mind, having been classroom tested over many years. It is a true “learner’s book” made for students who require a deeper understanding of probability and statistics. It presents the fundamentals of the subject along with concepts of probabilistic modelling, and the process of model selection, verification and analysis. Furthermore, the inclusion of more than 100 examples and 200 exercises (carefully selected from a wide range of topics), along with a solutions manual for instructors, means that this text is of real value to students and lecturers across a range of engineering disciplines. Key features: Presents the fundamentals in probability and statistics along with relevant applications. Explains the concept of probabilistic modelling and the process of model selection, verification and analysis. Definitions and theorems are carefully stated and topics rigorously treated. Includes a chapter on regression analysis. Covers design of experiments. Demonstrates practical problem solving throughout the book with numerous examples and exercises purposely selected from a variety of engineering fields. Includes an accompanying online Solutions Manual for instructors containing complete step-by-step solutions to all problems.}

This book examines the deeply divided terrain of the twentieth century city and its formative impact on narrative fiction. It focuses on two major ‘world authors’ at the two ends of the twentieth century who write, systematically, about the colonial and postcolonial cities they were born in: James Joyce and Dublin, and Salman Rushdie and Bombay.
